

Nguyễn Hữu Tiền

Senior Frontend Engineer

Live in **Vietnam** 🇻🇳

• **Email:** work@nguyenhuutien.com

• **LinkedIn:** <https://www.linkedin.com/in/tiennguyenhuu>

I am a front-end engineer currently living in Vietnam. When I was 14, my mom celebrated my birthday with a “new” second-hand computer for her game-addicted child. At that time, I was curious about how to make a website to fill the joy of looking at my favorite online game on that non-internet computer. Naturally, I quickly learn HTML and CSS in just one week. Now, after 8 years, I am still passionate about crafting high-quality web applications with elegant UI and great customer experience.

About Me

What I can offer

A self-directed, creative, detail-oriented, quick learner. Passionate about delivering quality software and advocating for the customer. Taking ownership of challenges and a positive attitude for improvement.

Core Skills

- | | |
|---------------------------------|---------------------------------|
| + ReactJS, TypeScript. | + Quick problem-solving. |
| + Hooks, Functional components. | + Positive attitude. |
| + GraphQL, RESTful APIs. | + Growth mindset. |
| + Tailwind, styled-components. | + Great attention to detail. |
| + Agile Scrum development. | + Good communication in English |

Experience

Dec 2021 - Present

TIKI Corporation

During my time at TIKI, I learned a lot about **working on a large project** with many stakeholders. Besides that, I have the opportunity to join a new project in the domain of **Super App/Mini Apps** and build it **from the ground up**. I worked as a senior front-end engineer and my main responsibilities are as follows:

- In collaboration with Product, Design, and Quality Control teams to create a **fully-featured E-Commerce** Mini App (using JavaScript-based Tini App Framework).
- Develop **more features** for Digital Services: revamp UI, remember user's choices for their next payment (improving UX), optimize complex logic handlers, and fix existing bugs for both desktop and mobile versions.
- Build reusable components and business logic that drives core user experience.
- Skills: ReactJS, Redux, Agile Project Management, Technical Training, Maintainability & User Acceptance Testing.
- Technologies: NextJS, Tini App Framework, TypeScript, Styled-Components & RESTful API.
- Team size: 20

Mar 2018 - Nov 2021

3F Solutions

My first joined company also a startup company provides online tools & services to help SMBs engage more customers using their own websites. I worked on multiple web development projects as a front-end developer, my main responsibilities are as follows:

- Work with the CEO and the engineering team to design and develop web-based applications providing CRM tools (bulking email, sending live-chat messages, exporting data of customers) and digital marketing solutions for enterprises. Also, providing customer support.
- Build the Livechat Widget (<https://fffchat.com>) from the ground up.
- Optimize real-time data streaming and state management, proactively diagnosing potential issues and implementing performance improvements.
- Working with RESTful and Websocket APIs.
- Deploy mobile applications to Google Play and App Store.
- Lead an intern team and help them along the way to junior.
- Skills: Angular, SocketIO, UI/UX Design, Material Design, Technical Training, Maintainability & Project Management.
- Technologies: Ionic Framework, SCSS, RxJS, TypeScript, and RESTful API.
- Team size: 8

2018 – Present

Freelance

Coming to freelancing to extend my professional knowledge of mobile development, I find it working with mobile applications and devices has a lot of fun that web programming doesn't have. I only accept projects that have both API and UI design already. I currently use **React Native (Expo)** to fast-forward create **fast, smooth, and consistent user experiences** on both iOS and Android devices, while still strictly following my clients' requirements. As working in the role of Mobile Application Engineer, I have delivered some cool projects as below:

- Develop & internally deploy **06 online-meeting apps** for a government organization called State Auditor for internal use.
- Develop **Bình Phước Official Gazette**, an official legal information publication mobile application of the State, uniformly managed by the Government. Also, publish on [Google Play](#) & [AppStore](#).
- Develop **Nitroxit**, an app that helps patients with coronary arteries better control information related to the disease. Published on [Google Play](#) & [AppStore](#).
- Analyze, design, and customize applications.
- Technologies: Expo, TypeScript, Firebase, Ionic Framework & RESTful API.
- Skills: React Native, Project Management, Library Programming, Mobile Application Development & Cross-platform Development.
- Team size: 2

2016 – 2019

Education

Computer Software Engineering

Cao Thang Technical College

Bachelor's Degree with Honors

Languages

 **English**

Proficient

 **Vietnamese**

Native Speaker
